PROFESSIONAL EXPERIENCE

LKDA - Strategic Creative Advertising – Pretoria, South Africa

Sept 2024 – present

Leading local strategic creative agency offering through-the-line marketing & creative solutions to grow clients' business

SENIOR WEB DEVELOPER

Promoted to manage client relationships and lead full-stack website development and maintenance, server infrastructure maintenance and management including hosting environments, and UI/UX development.

Coding: PHP, HTML, CSS, Java script, Laravel

- Collaborate across functions to oversee critical technical decisions and website optimization strategies (including code reviews and pre-go-live checks) that **drive optimal performance** and security across all web properties.
- Drive creation, including SEO and layout design, of responsive and user-friendly interfaces (WordPress, Wix, Shopify, Marketing, E-commerce, CRM, CMS (Umbraco)) consistently **ensuring adoption of best practices**.
- **Mentor junior developers** and organise and participate in team building activities.

Key Achievements:

- Led the transformation of the LKDA's global digital library application, significantly **improving performance and accessibility for worldwide users**, optimizing multiple subsidiary websites, enhancing the overall digital infrastructure, and implementing robust solutions that improved system reliability and user experience across all platforms.
- **Translated business needs into technical solutions** for numerous projects including optimizing the [Nissan South Africa](#) website, reducing load time by 5 seconds and increasing user engagement metrics.
- **Created a multi-database connector plugin** for cross-site data management during technical assessment.

Specialist in the distribution and integration of renewable energy technologies

WEB DEVELOPER

Oversaw full-stack website development and maintenance, server infrastructure management including hosting environments, UI/UX development, and worked with cross-functional teams to create responsive and user-friendly interfaces.

Coding: PHP, HTML, CSS, Java script

- Collaborated across functions to **manage critical technical decisions and website optimization strategies** that ensured optimal performance and security across all web properties.
- Managing client relationships and supported development of **client centric marketing automation strategies**.
- Adopted a multi-channel sales strategy that **generated R150,000 in revenue in 2 months**, exceeding monthly targets by 25% while maintaining a 32% gross profit margin and **achieving a 35% conversion rate**.
- Led the design and launch of a **complex dual-market e-commerce platform** serving both South African and Canadian markets – delivered a comprehensive solution (independently within 9 months) with a robust product management system for 1,500+ items, optimising imagery, targeted content creation, and SEO implementation, resulting in positive customer feedback and seamless cross-market functionality.
- **Revamped 12 critically broken websites**, resolving front-end and back-end issues, and delivering all fixes 3 months ahead of schedule, earning leadership recognition for efficiency and performance.

MVT-Tech and MVT-Systems – Randburg, South Africa

Feb 2022 – Jul 2022

Delivering comprehensive IT services

TECHNICAL MANAGER (Contract Position)

Led team of 2 technicians and served as escalation point for complex issues. **Improved response times by 15%** by implementing a new categorization system and maintained 97% SLA compliance while handling 60 weekly tickets.

Reflex Solutions – Randburg, South Africa

Feb 2022 – Jul 2022

Provider of high-performance solutions for connectivity, communications, workplace management, cloud and cybersecurity services

IT SUPPORT ENGINEER

Resolved hardware and software issues for 50+ users daily. Configured systems, troubleshoot network problems, and **maintained a 95% first-contact resolution rate** while consistently meeting SLAs and receiving positive feedback.

ENTREPRENEURIAL EXPERIENCE

- **Freelance Work, 2021** – Created website for CTU Training Solutions, LMH Projects, GhostX, and 3DLazerMonkey. Set up Servers, MediaServer, Media Players, and IT infrastructure for small businesses, and conducted **root cause analysis** to diagnose and resolved technical issues including hardware failures, software conflicts, network problems, and system errors.

GAMES DEVELOPED: [Cod Bo3 Crash Bandicoot](#)

[Cod Bo3 FORGOTTEN ROOM 115](#)
